make end of life decisions that uphold human dignity. There are pamphlets in the “Library Nook” in the vestibule of the church.

MAKING HEALTH CARE DECISIONS

is never an easy task. Today there are many options available to ease human suffering and prolong life. There are also many voices advocating for medical choices that do not embrace the Christian vision of the human person. And so, health care decisions have become more difficult and heart wrenching to make. By gaining insight into some common terms and protocols used in end of life health care, you will be better able to ask the right questions to your medical team, enabling you to

Today, there is a threat in society that is ripping apart families, ruining marriage, and jeopardizing our souls. That threat is pornography. It's all over the internet, and pornography has become a threat of enormous proportions. Nine out of ten boys are exposed to pornography before the age of 18. One in five mobile phone searches is for pornography. A quarter of smartphone owners admit to having pornographic material on their phone. Fifty percent of all Christian men and 20 percent of all Christian women say they are regular users of pornography. Fifty-six percent of divorces involve one party having an obsessive interest in pornographic websites. *Restored* is a ground breaking book that offers the stories of ten women who were able to find healing and restoration after the betrayal trauma caused by porn. It provides hope for women who feel their situation is hopeless. It also helps men understand the devastation that women experience as a result of pornography. It can help them find the **strength** to resist temptation.
